

Information Security Policy

Our group companies consider that the protection of information of individuals and customers is the social responsibility of a company, and that the confidential information of a company is its important assets. And our group companies, being in charge of manufacturing and sales of security products, recognize the importance of information security and will sincerely work on assuring the information security in order to continue to be a group of companies which is always trusted by customers.

1. We will provide with necessary management systems for protecting and managing the information assets, which consist of information, information equipment and systems such as computers and networks, and the products manufactured and sold by our group, in order to implement measures against anticipated threats.
2. We will observe the rules and regulations such as Privacy Protection Law, etc., define rules and likes for maintaining the information security assurance systems and continuously carry out the work such as training of all officers/employees in our group and managing suppliers/contractors and so forth.
3. We will maintain the information security assurance systems and exert ourselves to continuously improve them by taking the leading edge and best measures.
